STATISTICAL DATA ON STATE-MANAGED FARM LAND IN HUNGARY

[Comment: The list of megyek in this report deviates from the official list in effect in 1954, in which Hungary is divided into the following 19 megyek: Baranya, Bacs-Kiskun, Bekes, Borsod-Abaúj-Zemplen, Csongrad, Fejer, Gyor-Sopron, Hajdu-Bihar, Heves, Komarom, Nograd, Pest, Somogy, Szabolcs-Szatmar, Szolnok, Tolna, Vas, Veszprem, and Zala.

Figures in this report have been faithfully reproduced from Radio Free Europe Item 1545/55, dated 5 March 1955. It should be noted that totals given for several columns are not accurate.]

The following official statistical report shows the distribution, according to megyek of state farms, reserve lands, and other state-managed lands at the end of the 1954 agricultural year. The report is a supplement to Magyar Gazdasagkutato Intezet Kozlemenyei (Reports of the Hungarian Institute of Economic Research), dated 15 November 1954.

All figures in the tables are given in cadastral yokes [1.42 acres].

Figures given for reserve lands include vineyards under cultivation to a maximum extent of 30 percent. Lacking systematic cultivation, these lands may be considered economically unproductive.

Arable Land in Transdanubia

<u>Mege</u>	<u>Total Area</u>	<u>State Farms</u>	<u>Reserve Land</u>	<u>Evacuated Border Area</u>
